

China Machine Vision Power Intelligent Manufacturing Innovation Conference

21-22, July, 2021

Beijing International Convention Centre

Press Release | 22, July, 2021

VisionChina(BeiJing) 2021 Ends Successfully

On July 22, 2021, VisionChina(BeiJing) 2021, hosted by the Machine Vision Industry Union of ZGC and Messe Muenchen Shanghai Co., Ltd., came to a successful conclusion at the Beijing International Convention Center.

The two-day conference, with the motto of "intelligent manufacturing for high-quality development", featured six themes and 43 resourceful expert talks on cutting-edge machine vision technologies in its plenary and forum sessions. A total of 3,267 professionals attended the conference and the concurrent exhibition. 42 machine vision enterprises exhibited their latest products along with the conference, providing chances for supply-demand conversations.

Topics addressing industry trends and potential

Focusing on "intelligent manufacturing for high-quality development", VisionChina(BeiJing) 2021 launched 43 technical reports on five themes: AI and Deep Learning, 3D Vision and Robot, Precise Imaging and Vision Application, 5G & Its Evolution: Industrial Machine Vision, Smart Factory and Logistics. Against the current scientific, technological and economic backdrop in the world and in China, the conference aimed to accelerate the modernization and upgrading of the foundation and environment of the industry, while fully acknowledging the current economic pattern in China - "domestic circulation as the main approach, complemented by the international circulation". It enables China's manufacturing industry with machine vision technology, and focuses on industrial, innovation and ecological chains of intelligent manufacturing through in-depth and extensive discussion and presentation that provides inspiring and valuable reference for the decision-makers in the industry.

A VisionPlus+ Approach United Different Fields

VisionChina(BeiJing) 2021 brings together excellent machine vision brands and enterprises at home and abroad, such as Luster, Daheng, Hik robot, Allied Vision, Keyence, Baumer, iRayple, LUCID Vision, Azure Photonics, Aqrose, Dongguan CST, Zhaolong, Microvision, VLight, NU Method, Chaoen, VST, Elite, NORCO, Longwei Xinda, WPL, Zhi Sensor, BACHAM, Jiali, Brilliant Optics, Hongke, Percipio, Catchbest, Joview, AINTEC, Grand United Optics, Wordop, SVT, IMALLIGENT, LOOKLONG, INDEMIND, RZIMAGE, ACTELLIGENT, Jinglian, LightE, Shanghai Bojun, etc. They brought innovative products, high technology and solutions to the conference, where many had witnessed the glorious development of the industry.

China Machine Vision Power Intelligent Manufacturing Innovation Conference

21-22, July, 2021

Beijing International Convention Centre

Press Release | 22, July, 2021

In addition to the original exhibition range and their latest developments, the conference further covered related application fields and technologies, including machine vision applications in rail transit, solar energy, electronic information, biomedicine, aerospace and agriculture.

The two-day VisionChina(Beijing) ended successfully. Our next stop is Shenzhen in October!
